

## **Energist Exclusively Distributes LipoTherme Technology in the U.S. through Osyris Medical**

Nyack, NY — Energist NA, the North American division of Energist Group (based in Wales, UK) announced today the signing of a two (2) year exclusive distribution agreement with Osyris Medical (Lille, France) for LipoTherme technology in the United States. The two (2) year exclusive agreement focuses on the continued introduction and strategic expansion the LipoTherme technology to the US market through Energist NA growing sales channels. Energist will assume all new sales, marketing and services efforts in the United States effective immediately.

Osyris Medical is a cutting-edge French designer and manufacturer of medical devices designed for medical, surgical and aesthetic applications. Osyris Medical is a recognized leader in the laser lipolysis market with their LipoTherme technology.

John Lenihan, Global Vice President of Sales for Energist Group comments, “For Energist, partnering with Osyris makes perfect sense. It affords us the opportunity to quickly take advantage of a very lucrative and expanding market by offering LipoTherme, a well respected, cutting edge product.” Mr. Lenihan continues, “As a result of this agreement the US sales organization will now have one of the most comprehensive product offerings of anyone in the industry.”

Jaouad Zemmouri, CEO of Osyris Medical says, “We are pleased to be partnered with such a quality organization. The US sales team at Energist NA, led by Ron Borsheim VP of Sales will now give LipoTherme the time and attention it deserves. LipoTherme in our estimation is one of the most recognized laser lipolysis devices on the market today and we have no doubt patients, practitioners, Energist and Osyris will all benefit by this relationship. “

### **About Energist Group**

Energist Ltd, based in Swansea, South Wales, UK was founded in 1999. Energist Group designs, manufactures and markets a variety of light-based aesthetic devices, serving the medical, spa and beauty market segments. The Group’s MedArt facility in Copenhagen, Denmark, manufactures a range of fractional CO2 and diode lasers for medical, surgical and aesthetic applications.
