CEO PROFILE

An outstanding career between sciences and business. Teacher and researcher in physics in the University of Sciences & Technology of Lille, Jaouad Zemmouri is also the founder of OSYRIS in 2002.

Jaouad Zemmouri, President & CEO, OSYRIS.

Sciences...

With 20 years of teaching and research in physics and a specialization in optics & lasers, Jaouad Zemmouri is a recognized scientist in his domain. Indeed, he's got a sound experience in design and development of lasers applications, in the sector of telecommunication and optoelectronics, and more recently in the medical field. Throughout his career, he published his works in high level scientific magazines (43 publications) and registered fifty international patents. Specialist of interactions between laser and matter, he is regularly invited to scientific conferences, all around the world.

Jaouad was professor at **Lille University** where he managed 9 PhD working on: nonlinear dynamics, chaos, Brillouin fiber laser, photonic crystals and interaction between lights and matter. University of Lille is an old and high level University in France and used to be managed by PhD Pasteur during the nineteenth century.

Jaouad has really enjoyed working in the PhLAM (Laboratory of Laser Physics, Atoms and Molecules): **"The interest was the subject and the quality of the researches. I got deeply involved in my job of researcher"**. Passionate by physics, he contributes to promote sciences in schools, through the program "Itinerant Physics", in order to interest the students in scientific courses.

... and Business

Jaouad Zemmouri understood very quickly that his researches on laser could be materialized in the industrial and medical fields. So, in order to develop and market laser's applications, he created in 2002 a spin-off from the University of Sciences & Technologies of Lille. He decided to call it OSYRIS (Optical Systems for Research, Industry and Sciences). The company is specialized in the domain of laser and its medical and industrial applications.

"Research and innovation are the basis of our development" explains Jaouad. After only 8 years of existence, OSYRIS is divided into 3 subsidiaries: R&D, Medical Applications and Industrial Domain. Today, OSYRIS is a flagship of the innovation and development in France. This dazzling success is recognized by the specialists: Jaouad Zemmouri became "Entrepreneur of the Year" according to the group "L'Express-Expansion" (2006) and "Le Nouvel Economiste" in 2007. He is also appointed as member of many regional authorities for the innovation and the economic development of the North of France.

In 2007, Jaouad Zemmouri decided to go to the conquest of the United States to develop **OSYRIS MEDICAL** and its market, and give it an international dimension. Jaouad completed this huge challenge successfully and in 2008, Osyris took the control of Medsurge Inc., and the subsidiary **OSYRIS MEDICAL USA**, based in Dallas, came into the world.

Osyris Medical is now a worldwide company; the teams, in France and in the USA, are working all together to continuously improve and develop the business- to make Osyris Medical always a better company.

Personal

Jaouad Zemmouri was born in Morocco and arrived in France, in Lille, in 1981 to complete his studies. Originally from a large family of 12 children, his parents transmitted him values of work and pugnacity. Married and father of 3 children, he has been developing his own ambitions for Osyris while preserving his family.

Educational

In 1987, he obtained a Doctorate Degree in the Laboratory of Laser Physics, Atoms and Molecules. He has the title of University Professor. He is allowed to carry out researches.
